DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brownells Catalogue-“Grip Spacer Plates” on page 12 in view of Szabo.

Brownells discloses the claimed metal grip plates to be added to a Colt Model 1911 pistol. Szabo teaches the specifics of the Colt Model 1911 pistol to show that this pistol reads over the claimed elements of the pistol to which the plates are being added.

Brownells disclose the plates as being .032” thickness, which is only .002” thicker than the upper range thickness claimed. Without any evidence of unexpected results, to decrease the thickness of the plates by such a small amount is considered to have been obvious to one having ordinary skill in the art, since this would have the obvious effect of making the grip slightly slimmer and lighter.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Marable et al, Yap, and Coon are cited as being of interest since they disclose pistol grip additions.
